2.3.5: Essay

Creativity

Creative thinking is an individual skill it helps in critical thinking it helps the ability to think about the task or a problem in a new or a different way or ability to use imagination to generate new ideas Thus institution Encourages the students to engage in a group discussion involvement in cultural activities and leadership etc. Students are encouraged to take active part in social and cultural activation, leadership, developing discipline and contributing towards growth of our community Institute thus gives opportunity to develop their creative talents.

Analytical Skill

Projects are assigned to provide teamwork & helps them to participate & improve their learning Institute also organizes the case presentation from which they develop the skill regarding evaluation differential diagnosis, prognosis, posology, Homoeopathy approaches and management The students are given opportunities to show their skill in case taking by communicating with the patients. The case taking is evaluated by the Dept. teachers.

Innovation

Students are encouraged to take part in research projects they are assigned the thesis where they develop their innovative skills. The aim is to foster creative & problem solving abilities amongst students & include them to adopt out of the box thinking methodology in finding solutions.
